High School 9

## PROJECTS

**E-commerce web app for Jeevaniya Naturals Pvt Ltd**  
<https://jeevaniyanaturals.com/>

I worked on the customization of Saleor E-Commerce Platform from scratch. Besides writing new React components and integration of Saleor backend with Odoo, I was actively involved in testing the app and training the team at Jeevaniya Naturals to deal with various scenarios faced every day. This helped me in understanding all features of Saleor and ensured success when we finally launched the new web app. In the first month, I also used Mouseflow to learn about actual usage and improve the UX

**Anime App**
